### TSCA 8(e) Supplemental Notice on Ammonium perfluorooctanoate

Dear 8(e) Coordinator:

The Association of Plastics Manufacturers in Europe (APME) has conducted an oral toxicity study of ammonium perfluorooctanoate in monkeys. One of our members, 3M, submitted a notice concerning this study to the TSCA Section 8(e) Docket on November 19, 1999, EPA Ref. No. 8EHQ-1199-14596.

APME has now received final reports concerning the study and we are enclosing them to supplement 3M's prior notification. We are enclosing the reports on the full study, and the accompanying range-finding study and analytical work, as follows:

- Final Report, 26-Week Capsule Toxicity Study with Ammonium Perfluorooctanoate (APFO) in Cynomolgus Monkeys, Covance Laboratories, December 18, 2001
- Final Report, 4-Week Capsule Toxicity Study with Ammonium Perfluorooctanoate (APFO) in Cynomolgus Monkeys, Covance Laboratories, December 18, 2001
- Final Report, Determination of the Presence and Concentration of Perfluorooctanoate Fluorochemical in Liver, Serum, Urine and Feces Samples, 3M Environmental Laboratory and Centre Analytical Laboratories, Inc., June 11, 2001.

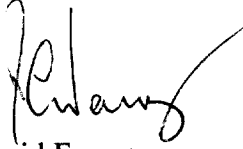

The enclosed reports are in PDF format on compact disc.

89020000040

Please feel free to contact me with any questions.

Yours faithfully,

A handwritten signature in black ink, appearing to read 'D. Farrar', with a long, sweeping horizontal stroke extending to the right.
